

The Power Source

Igniting the Future of Florida

A Message From FWELF Founder Lila Jaber

Diverse energy infrastructure, sound regulatory policy, and world-class talent are how Florida continues to meet the demands of a growing economy. Delivering power to all Floridians, our energy providers have demonstrated their roles in driving innovation, pandemic and storm response, and job creation. It's one of the many reasons Florida's Women in Energy Leadership Forum was launched. By recognizing leaders in the energy industry and celebrating their success in growing Florida's economy, we can inform, inspire, and motivate the next generation of talented workforce. We know our efforts are working because so many of you have shared your stories with me. From the students who have been hired to the women who have decided to pursue additional leadership positions to the CEOs who have implemented internal women in energy initiatives, I say THANK YOU and congratulations. You can do this and more..

Like so many of you, we have not let COVID negatively impact our work. Our hearts go out to all those who have lost loved ones due to this pandemic. I know one thing for sure – we are strong, resilient, and will recover stronger and better than ever. During this year's Forum, we will hear how some of you have dealt with COVID in your workplaces and with me, you will see that this industry responded with exactly what you'd expect – leadership, speed, and compassion. We hope you will join us in this dialogue and, more importantly, we hope that you will be there to inform, inspire, and motivate others to work in these rewarding opportunities created by the energy sector. Now, in the Forum's 5th year, our commitment to highlighting women leaders in this industry and exploring topics of mutual importance to all stakeholders continues. With an agenda full of esteemed speakers from some of the greatest energy companies in the world, this is #EnergyDrivingInnovation.

Thank you to Gunster, our presenting sponsor. Special thanks to Florida Power & Light and Duke Energy for their title sponsorship. *It takes a village* and we are able to put this program forward because of ALL of our dedicated sponsors. For a full list of sponsors, please [click here](#).
